

Scott Klososky's Room & A/V Set Up

The following is a list of room & a/v preferences. Please know these are flexible if there are extenuating circumstances.

- **Staging:** Scott will use his laptop from the stage, so a podium or table is needed, along with a stable Internet Connection.
- **Microphone:** Wireless lavalier microphone
- **Screen & Computer Projection System:** Scott will use his own laptop because he often has music and video files that would not be easy to move to another computer. He uses a 2010 Mac Book Pro. An LCD projector system compatible with a Mac computer is required, as well.
- **Media/PowerPoint/Materials:** Scott uses "Keynote" to create his media presentation and often works on it up until the last minute, because of the way he often customizes them for the audience. If you need to review the content or print hand-outs in advance, please let us know in advance, so he can meet the deadlines.
- **Recording:** We encourage recording, but a separate agreement is required and a licensing fee may apply, depending on how you plan to use the recording after the event. **If you plan to record any portion of Scott's presentation, please call our office to request a video / audio taping agreement.**
- **Other:** Sometimes Scott gives out t-shirts to a few audience members. Please let us know in advance if you'd like to have these shirts available as "give-aways."
